## "My Two Cents"

### **“Read My Lips; it’s The Middle Class Stupid!”**

Has anyone decided from whence all the funds to fix our health care system are coming? Yes, that was decided years ago.

In a previous issue, I shared with you how Hillary Clinton was in cahoots with the medical and pharmaceutical companies and congress is in bed with the insurance companies. So, the rich are taken care of. Now, the democrats want the folks who don’t work and won’t work to have

insurance. So, the poor are taken care of. Now just how is this going to happen? I’m waiting; will someone kindly inform me?

President Obama says there will be no tax increase. What do you say, Senator Wilson? If [CBS](#) can be believed, Joe just may have a point even if it was made rather rudely.

According to National Coalition on Health Care, health care costs are rising so fast it is causing businesses to cut back on coverage. Is this a foreshadowing of the effects of government run health

insurance? If companies are cutting back now, how will they react when there is a cheap government sponsored program for their workers to enroll? Why would a smart business owner not just say, “Ok, there you are: enroll in the government program. I can no longer afford to provide coverage.”

So, if you have not figured out my “Two Cents”, yet; “Read My Lips; It Is The Middle Class, Stupid!”
